DETAILED ACTION

1. This communication is responsive to the preliminary amendment filed 05/03/2001.
2. The Art Unit location of your application in the PTO has changed. To aid in correlating any papers for this application, all further correspondence regarding this application should be directed to Group **Art Unit 2646**.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130 (b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claims 1-17 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-19 of U.S. Patent No. 6,658,122. Although the

Art Unit: 2643

conflicting claims are not identical, they are not patentably distinct from each other because claims 1-19 of U.S. Patent No. 6,658,122 are similar in scope to claim 1-17 of this U. S. patent application (09/830,922) with obvious wording variations. For example:

Drawings

4. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the “a power supply” must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as “amended.” If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled “Replacement Sheet” in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112, 2nd Paragraph

The following is a quotation of the second paragraph of 35 U.S.C. 112:

Art Unit: 2643

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter, which the applicant regards as his invention.

5. Claims 1-17 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

There are numerous indefinite limitations/terms in the claims, the examples are:

In claim 1, it recites the limitation of "the sound signal" in line 1. There is insufficient antecedent basis for this limitation in the claim.

In claim 1, it recites the limitation of "the eardrum" in line 2. There is insufficient antecedent basis for this limitation in the claim.

In claim 1, it recites the limitation of "the incoming sound" in line 5. There is insufficient antecedent basis for this limitation in the claim.

In claim 1, it recites the limitation of "the electroacoustic system" in line 10. There is insufficient antecedent basis for this limitation in the claim.

...

Since there are too many indefiniteness terms and/or limitations in the claims, applicant's corporation for thoroughly checking and revising the claims would be highly desirable for speeding up the processing of this application.

Conclusion

6. The prior art of U.S. Patent made of record and not relied upon is considered pertinent to applicant's disclosure.

Art Unit: 2643

7. The prior art of Foreign Patent Documents has not made of record; since no copies of listed foreign patents have been provided by the applicant. Please provide copies in next communication for consideration.
